

CDR GATEWAY

CDR Gateway (CDR Gateway Application System) is a business solution to fulfill the requirement of Interconnection CDR.

This CDR will only consist of interconnection data record only, to simply the CDR process mechanism in Interconnect Billing System, which will process Interconnect CDR. CDR is designed to create new CDR that consist only interconnect data record, that are taken from CDR from MSC/MMS. After Interconnect CDR creation process, the original CDR (retail + interconnect) will be sent to billing system purpose and interconnect CDR will be sent to interconnection billing.

CDR GATEWAY

NT CDR Gateway has complete and powerful standar modules :

- Audit Trail
- Trouble Escalation
- Record Browse and Editor (CDR Correction)
